- **Winter Pitches - Seeding Tips** At the end of this very wet Winter sports season, there may be a lot of damage to Winter pitches. With only as little as eight weeks to get pitches renovated and back into tip-top condition for the Autumn fixtures. Key to the success of the renovation is not wasting time; make sure that you have seed and top dressing in stock.

For renovating pitches - a renovation programme should definitely include *overseeding*. For a stretched budget - overseed the most worn areas. Whatever the financial constraints, a cut in seed rates is really just wasting money, far better to assess the pitch areas that really need overseeding and treat them with 20-25g/sqm for stronger establishment and more value for money.

Overseeding Cricket Wicket/Outfields and Sports Greens
